Appendices

1. Large, small and conversion site housing completions from 1 April 2006 – 31 March 2019	
2. Dwelling demolitions per settlement (1 April 2006 – 31 March 2019)	
2. (Continued). Residential demolitions 1 April 2018 - 31 March 2019	
3. Row 2 - Schedule of large residential sites from 1 April 2018 – 31 March 2019	
4. Large sites 1 April 2019 – projected annual housing completions	
5. Outline application decision to first completion timeframes – including reserved matters (1 April 2006 - 31 March 2019)	
6. Outline application timeframes from submission to decision including S106 agreements - Large sites only (1 April 2006 - 31 March 2019)	
7. Gross Small site / conversion site summary at 1 April 2019	
8. Small sites at 1 April 2019 – projected annual housing completions	
9. April 2019 Housing Trajectory	
10. Affordable housing provision (1 April 2018 – 31 March 2019)	

11. Urban / rural residential site densities – large sites completed between 1 April 2006 – 31 March 2019
12. Residential site densities – large sites completed between 1 April 2018 and 31 March 2019

1. Introduction

1.1. The National Planning Policy Framework (NPPF) (February 2019) sets out the Government's overarching planning strategy with the purpose of contributing to the achievement of sustainable development.

1.2. Paragraphs 59 and 60 of the NPPF states:

To support the Government's objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed, that the needs of groups with specific housing requirements are addressed and that land with permission is developed without unnecessary delay.

To determine the minimum number of homes needed, strategic policies should be informed by a local needs assessment, conducted using the standard method in national planning guidance – unless exceptional circumstances justify an alternative approach...

1.3. The standard method uses a formula to identify the minimum number of homes expected to be planned for, in a way which addresses projected household growth and historic under-supply. The Local Planning Authority (LPA) is required to calculate its local housing need figure at the start of the plan-making process.

1.4. LPAs are also required to identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years' worth of housing against their housing requirements set out in adopted strategic policies, or against the local housing need where the strategic policies are more than five years old.

1.5. As the Council's Core Strategy was the strategic policy document which set the Borough's housing requirement and was adopted in 2009, it is considered that the policies specific to housing are more than five years old and therefore Hinckley & Bosworth Borough Council will be using the local housing need based on the standard method.

1.6. Hinckley & Bosworth Borough Council is currently in the process of reviewing its Local Plan with the intention of submitting it to the Planning Inspectorate in September 2021 where a housing requirement will be identified through strategic plan-making.

2. Housing trajectory and five-year housing land supply methodology

2.1. Local Housing Need

- 2.1.1. As mentioned in paragraph 1.5, the Council will be using the standard method to calculate its local housing need as the basis for assessing its five year supply of specific deliverable sites in accordance with footnote 37 of the NPPF.
- 2.1.2. National Planning Practice Guidance for Housing and Economic Needs Assessment outlines the process for calculating local housing need.
- 2.1.3. **Step 1:** Setting the baseline using 2014 based household projections for Hinckley and Bosworth borough and calculating the average annual household growth over a 10 year period from 2019 which equates to **382 dwellings**.
- 2.1.4. **Step 2:** making an adjustment to the annual projected household growth figure (as calculated in step 1) based on the affordability of the area.
- 2.1.5. The most recent median workplace-based affordability ratios published by the Office for National Statistics are to be used for Hinckley and Bosworth Borough.
- 2.1.6. For each 1% the ratio is above 4 the average household growth should be increase by 0.25%. To be able to apply the percentage increase adjustment to the projected growth figure we need to add 1.

The formula is given below.

$$\text{Adjustment factor} = \left(\frac{\text{Local affordability ratio} - 4}{4} \right) \times 0.25 + 1$$

For Hinckley and Bosworth Borough this equates to:

$$1.196 = \left(\frac{7.14 - 4}{4} \right) \times 0.25 + 1$$

- 2.1.7. Therefore to calculate the local housing need figure:

Household growth projections x Adjustment factor = Local housing need

$$382 \times 1.196 = \mathbf{457 \text{ dwellings per annum}} \text{ (to the nearest whole number)}$$

- 2.1.8. **Step 3:** A cap should then be applied to limit the increases a local planning authority can face and this is calculated depending on the status of the strategic policies.

2.1.9. As the Council's strategic policies (Core Strategy) are more than 5 years old and have not been reviewed, the local housing need figure is capped at 40% above whichever is the higher of:

- a) The projected household growth for the area over the 10 year period identified in Step 1;
- b) The average annual housing requirement figure set out in the most recently adopted strategic policies.

2.1.10. A worked example for clarity follows:

- The average annual housing requirement in the existing relevant policies (Core Strategy) is 450 dwellings per year.
- Average annual household growth over 10 years is 382 (as per Step 1).
- The minimum annual local housing need figure is (457 as per Step 2).
- The cap is set at 40% above the higher of the most recent average annual housing requirement figure or household growth:

$$\text{Cap} = 450 + (450 \times 40\%) = 450 + 180 = 630$$

2.1.11. The capped figure (630) is greater than the minimum annual local housing need figure (457) and therefore does not limit the increase to the local authority's minimum housing need figure. The minimum figure for Hinckley and Bosworth Borough Council is therefore **457 dwellings per annum**.

2.2. Housing Delivery Test

2.2.1. The Housing Delivery Test (HDT) is a percentage measurement of the number of net homes delivered against the number of homes required, over a rolling three year period.

$$\text{Housing Delivery Test (\%)} = \frac{\text{Total net homes delivered over three year period}}{\text{Total number of homes required over three year period}}$$

2.2.2. The HDT will be published every year in November by Government and the first HDT results were published March 2019¹.

2.2.3. Hinckley & Bosworth Borough Council's delivery between 1 April 2015 and 31 March 2018 was 1,585 dwellings against the 1,122 dwelling requirement. Therefore the Council passed the HDT with 141%.

2.2.4. If delivery of housing falls below the housing requirement, then the following consequences apply as set out in the NPPF:

- If the HDT result falls below 95% the publication of an action plan is required;
- If the HDT result falls below 85% a 20% buffer on the 5 year housing land supply is required; and
- If the HDT result falls below 75%, the presumption in favour of sustainable development and paragraph 11d is engaged.

2.2.5. The consequences will continue to apply until the subsequent Housing Delivery Test results are published, or a new housing requirement is adopted.

¹ <https://www.gov.uk/government/publications/housing-delivery-test-2018-measurement>

2.3. Five Year Housing Land Supply

- 2.3.1. As stated within paragraph 73 of the NPPF, LPAs should identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years' worth of housing against their housing requirement set out in the adopted strategic policies, or against their local housing need where the strategic policies are more than five years old.
- 2.3.2. The supply of specific deliverable sites should in addition include a buffer (moved forward from later in the plan period) of:
- a) 5% to ensure choice and competition in the market for land; or
 - b) 10% where the LPA wishes to demonstrate a five year supply of deliverable sites through an annual position statement or recently adopted plan, to account for market fluctuations; or
 - c) 20% where there has been a significant under delivery of housing over the previous three years, to improve the prospect of achieving the planned supply.
- 2.3.3. As the Council's HDT results are 141% as of February 2019, there is no significant under delivery and a 5% buffer is appropriate.
- 2.3.4. The buffer is added to the annual housing requirement (5% of 457 = 23 dwellings per year). This 5% buffer, added to the annual requirement of 457 dwellings, equates to an annual requirement of at least 480 dwellings per year for the next five years (totalling 2,400 dwellings over this period).
- 2.3.5. The Council has employed a positive methodology in calculating the five year housing land supply position, following guidance provided by the NPPF, Planning Practice Guidance, and planning appeal decisions specific to the borough.
- 2.3.6. It is important to note that the NPPF has clarified the definition of deliverable and so if a site is to be considered deliverable, sites for housing should be "available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years. In particular:
- a) *sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans).*
 - b) *where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years."*²
- 2.3.7. This monitoring statement identifies the residential land supply within the borough as at 1 April 2019, including a housing trajectory and the five year housing land supply position. Further details of housing commitments, completions and demolitions and information on a number of supplementary housing issues are also provided.

² MHCLG, National Planning Policy Framework, Annex 2: Glossary

2.4. Housing trajectory and five-year housing land supply methodology

- 2.5. The following section outlines the main stages the Council has used in producing a housing trajectory (and thus from which the five year supply of housing land can be calculated). The methodology used to calculate the provision from each row of the housing trajectory is also provided.

Stage 1 –
Identify the level of housing provision to be delivered over years
0-5 (1 April 2019 to 31 March 2024) and years 6-10 (over the course of
the Plan period up to 2026):

- 2.6. As established in section 2.1 of this statement, the Borough's local housing need is 457 dwellings per annum.
- 2.7. It should be noted that C2 uses are counted within the Borough's completion figures for the latest monitoring year (1 April 2018 – 31 March 2019) and C2 sites are also included in the trajectory. Following guidance from the Housing Delivery Test Measurement Rule Book (July 2018) on communal accommodation a 1.8 ratio has been applied to the number of units of each permission. This average is calculated by dividing the total number of adults living in all households by the total number of households in England (using the 2011 census figures).

Row 1: Past completions

- 2.8. Row 1 of the housing trajectory contains the net annual housing completions per monitoring year since the start of the plan period of 2006. The annual completion figures are net of dwelling demolitions, summarised in Table 1. The completion and demolition figures are obtained from a combination of Building Control completion and demolition records, council tax records, new waste bin data, site visits carried out by planning officers, and information from Development Management officers and developers. A settlement specific breakdown of dwelling completions is provided in Appendix 1. Dwelling demolitions per parish/settlement since 2006 are listed in Appendix 2 along with the specific sites demolished 1 April 2018 – 31 March 2019.

Table 1: Borough housing completions net of demolitions (1 April 2006 - 31 March 2019)

Year	New Build	Conversions	Demolitions	Total
2006/07	401	45	-8	438
2007/08	391	19	-12	398
2008/09	457	24	-7	474
2009/10	330	28	-5	353
2010/11	229	11	-13	227
2011/12	368	19	-14	373
2012/13	212	31	-18	225
2013/14	487	7	-14	480
2014/15	742	18	-8	752
2015/16	563	37	-15	585
2016/17	544	20	-8	556
2017/18	393	41	-11	423
2018/19	401	71	-8	464
Total	5,512	371	-140	5,748

Stage 2 –

Identify sites that have the potential to deliver housing during years 0-5 (1 April 2019 to 31 March 2024) and years 6-10 (over the course of the plan period up to 2026):

- 2.9. Sites that have the potential to deliver housing during years 0-5 need to be deliverable. Potential sites include those that are allocated for housing in the Site Allocations DPD, sites that have planning permission, and sites permitted pending the signing of a section 106 agreement. To be considered deliverable all sites need to have a realistic prospect of delivering housing on the site within five years.
- 2.10. The Council historically has not identified a specific windfall allowance, however further work has been done to look at the Council's windfall housing delivery and it is concluded that as of 1 April 2019 an annual windfall allowance from year four onwards in the five year housing land supply is justified and will be updated annually. A separate evidence paper has been created and is available on our website.
- 2.11. The NPPF and the *Housing and economic land availability assessment* section of the Planning Practice Guidance provides further information on the assessment of deliverable, specifically to be deliverable sites should:
- Be suitable - The site offers a suitable location for development now (taking into account the factors identified in paragraph 19 of the Planning Practice Guidance)
 - Be available – The site is available now. A site is considered available for development, when, on the best information available (confirmed by the call for sites and information from land owners and legal searches where appropriate), there is confidence that there are no legal or ownership problems, such as unresolved multiple ownerships, ransom strips tenancies or operational requirements of landowners. This will often mean that the land is controlled by a developer or landowner who

has expressed an intention to develop, or the landowner has expressed an intention to sell. Paragraph 20 of the Planning Practice Guidance elaborates by stating that *“because persons do not need to have an interest in the land to make planning applications, the existence of a planning permission does not necessarily mean that the site is available. Where potential problems have been identified, then an assessment will need to be made as to how and when they can realistically be overcome. Consideration should be given to the delivery record of the developers or landowners putting forward sites, and whether the planning background of a site shows a history of unimplemented permissions”*.

- Be achievable – There is a reasonable prospect that housing will be delivered on the site within five years and in particular that development of the site is viable.

2.12. As previously mentioned the NPPF states that sites which do not involve major development and have planning permission, and all sites with planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will no longer be delivered within five years (for example they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans). Where a site has outline planning permission for a large site, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years.

2.13. The sources of deliverable and developable housing within the borough are then projected onto the housing trajectory. The following section includes an explanation of how site deliverability has been assessed taking into account the principles of the NPPF and Planning Practice Guidance described above.

Row 2: Large sites

2.14. Large sites include permissions for 10 dwellings or more. The status of Large sites within the borough at 1 April 2019 is contained within Appendix 3 and the projected net additional dwellings provided per annum is provided with Appendix 4.

2.15. The Large sites in Appendix 4 have been sectioned in to three categories to reflect the definition of deliverable in the Glossary to the NPPF and guidance in PPG:

- Deliverable A) - Sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or the sites have long term phasing plans)
- Deliverable B) - Where a Site has outline planning permission for major development, has been allocated in a development plan, has a grant of planning permission in principle, or is identified on the Brownfield Register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site in five years.
- Other deliverable sites - whilst not specified under the “in particular” section of the definition of 'deliverable' in the NPPF Glossary, these sites are included

because, as a matter of planning judgment, they are regarded as being “available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years”.

- 2.16. The initial assumptions made regarding a site’s projected time frame for delivery (lead-in times) are described below. However for Large sites this may vary dependant on the site specific knowledge acquired through the landowner and or developer. If:
- The site is under construction (this also applies to the specific plots that are under construction) – there will be completions in the next monitoring year.
 - the ground has been cleared but the site is not under construction (and where the site is under construction but a specific plot is not started) – there will be completions in the second monitoring year; and
 - The site has outline or full planning permission but is not under construction or the ground has not been cleared – there will be completions from the third monitoring year.
- 2.17. The estimated build rate per annum applied for each site is 40 dwellings as informed by the SHLAA Review 2014 and 2016 Developer Panel, as well as current market conditions. This build out rate has been amended on certain sites based upon information received or evidence provided.
- 2.18. As suggested by paragraph 48 of the Housing and economic land availability assessment planning practice guidance, evidence has been gathered on the determination of outline planning applications to first completion between April 2006 and March 2019. On average:
- Section 106 agreements take 6 months to complete with decisions being issued within 1 week of the S106 agreement being signed;
 - Reserved matter applications are then submitted within 11.5 months of the outline decision being issued;
 - Reserved matter applications are then determined within 4.5 months; and
 - The first housing completion is then a further 16 months after the reserved matters decision.
- 2.19. Table 2 shows that, on average, the first home delivered on a large site following the grant of outline consent is 34 months (2.8 years). Appendix 5 shows the breakdown of the large sites used to calculate average timeframes for each part of the process. This supports the Council’s approach to where housing is projected into the housing trajectory.

Table 2: Outline application decision to first completion timeframes – including reserved matters (1 April 2006 - 31 March 2019)

From	To	Average Time (months)		
		Below 100 Dwellings	Above 100 Dwellings	Overall
Outline decision	Reserved matters submission	6.5	9.7	11.5
Reserved matters submission	Reserved matters decision	4.43	4.17	4.48
Reserved matters decision	1 st Completion	15.4	16.3	15.9
Outline decision	1 st Completion	36.3	30.6	33.6

*the overall figures are subject to rounding and are detailed in Appendix 5

- 2.20. These assumptions are then combined with any specific site knowledge from Development Management, in addition to a judgement on market conditions, the size of the site and recent build rates in combination with all relevant developer/landowners to give an update on their site regarding additional work required to get the site started and then completed.
- 2.21. Large sites with a resolution to grant permission subject to the signing of a Section 106 agreement are also included within Row 2 of the housing trajectory, with the same assumptions as above regarding achievability applied to each site. When resolution to grant permission is provided at planning committee Section 106 agreements have always been resolved between the council and developer, therefore these sites are considered deliverable where there is a realistic prospect that housing will be delivered on the site within five years. Additional evidence has also been gathered relating to the length of time it takes from a resolution to grant planning permission to the issuing of a planning permission, which is the Section 106 agreement negotiation process. Appendix 6 shows that on average it takes 6 months to seal the section 106 agreement. This data has been used to inform the trajectory of large sites with a resolution to grant planning permission.
- 2.22. Sites with planning permission may expire if a material start is not made on site before the expiry date as set out in the decision notice. Table 3 displays that 3.55% of large site planning permissions have expired since the adoption of the Core Strategy, so this expiry rate has been applied to the projected delivery from large sites where the permission has not yet been implemented. Once the expiry rate has been applied a total provision per year from large site commitments can be provided and this has been projected within Appendix 4.
- 2.23. It will be noted that the Earl Shilton SUE as allocated in the Core Strategy and subsequent Earl Shilton and Barwell Area Action Plan, in contrast to previous years, has not been included in the five year supply. This is because the Council has reached the view that there is no longer sufficient evidence to show that there is a realistic prospect that housing will be delivered on this site within five years.

- 2.24. The Barwell SUE is still anticipated to deliver homes within the next five years, however the Council has reduced the number it believes will be delivered based on current developer interest. The S106 agreement has not yet been signed, however the Council have been involved in many discussions with landowners and the developers to ensure the S106 is signed in the coming months.

Table 3: Annual expiry rates on large sites (1 April 2009 to 31 March 2019)

Year	Dwellings Available (at end of each year)	Number of Dwellings Expired	Expiry Rate (%) (Dwellings Expired as a Percentage Dwellings Available)	Number of Sites Expired
2009/10	1247	34	2.73	2
2010/11	1494	114	7.63	4
2011/12	2034	118	5.8	6
2012/13	2142	15	0.7	1
2013/14	1882	107	5.69	4
2014/15	1732	132	7.62	5
2015/16	1318	0	0	0
2016/17	2140	0	0	0
2017/18	2007	49	2.44	1
2018/19	2189	77	3.52	2
Total	18,185	646	3.55	25

Row 3: Small sites

- 2.25. Small sites include permissions for 9 dwellings or fewer. Conversions and change of use applications are also included. The status of small sites within the borough at 1 April 2019 is summarised for each settlement within Appendix 7. Row 3 of the housing trajectory contains the projected net additional dwellings provided per annum from small sites at 1 April 2019 from the start of the current monitoring period. The breakdown of these projections is contained within Appendix 8.
- 2.26. While the NPPF states that all sites with detailed planning permission should be considered deliverable, if there are sites the Council is aware that development is unlikely to occur, this has been taken account of. The same assumptions regarding the projected time frame for development (lead-in times) and the expiry date are applied to each site for the initial assessment. Small sites permitted pending the signing of a Section 106 agreement are also included within Row 3 of the housing trajectory, with the same assumptions as above regarding achievability applied to each site.
- 2.27. Due to windfall sites of 9 dwellings or less being included in year 4 onwards, small sites are only projected in to the first three years of the trajectory to avoid any chance of double counting.
- 2.28. Similar to large sites with planning permission, an expiry rate for small sites has again been applied. Table 4 displays that 7.73% of small site planning permissions have expired since the adoption of the Core Strategy, so this expiry rate has been applied to the projected delivery from small sites where the permission has not yet been implemented and where delivery from a

landowner/developer has not been confirmed. Once the expiry rate has been applied a total provision per year from small sites can be provided, projected within Appendix 8.

Table 4: Annual expiry rates on small sites (1 April 2009 to 31 March 2019)

Year	Dwellings Available (at end of each year)	Number of Dwellings Expired	Expiry Rate (%) (Dwellings Expired as a Percentage Dwellings Available)	Number of Sites Expired
2009/10	413	31	7.51	23
2010/11	352	54	15.3	19
2011/12	340	25	7.35	9
2012/13	362	27	7.46	18
2013/14	281	48	17.1	13
2014/15	448	9	2.01	8
2015/16	436	35	8.03	15
2016/17	577	41	7.11	21
2017/18	456	36	7.89	12
2018/19	441	11	2.52	12
Total	4,106	328	7.99	151

- 2.29. Once the main stages have been followed the housing trajectory is complete and five-year housing land supply position may be calculated. The April 2019 housing trajectory is contained within Appendix 9. The Council's five-year housing land supply position as at 1 April 2019 is displayed in Table 5.

**Table 5:
1 April 2019 five-year housing land supply position**

		Dwellings
a	Borough Housing Requirement (standard method and affordability ratio) Total Required (x5)	457 per annum 2285
b	Deliverable housing supply required for 5 years with additional 5% buffer (5% of annual requirement of 457 dwellings = 23 dwellings)	2,400 480 per annum
c	Housing Supply (1 April 2019 – 31 March 2024) Row 2. Large Sites = 1,283 dwellings + Row 3. Small Sites + Windfall = 376 + 134 = 510 dwellings + Row 4. Barwell Sustainable Urban Extension = 200 dwellings + Row 5. Earl Shilton Sustainable Urban Extension = 0 dwellings	1,993
d	Overprovision/Shortfall (b - c)	-407
e	Number of years supply (c / 480 dwellings per annum)	4.15

3. Affordable Housing

- 3.1. Advice on the provision of affordable housing in the borough is included in the Core Strategy and the Affordable Housing Supplementary Planning Document (SPD). Under this advice, Policy 15 of the Core Strategy seeks the provision of 20% affordable housing on all sites with 15 or more dwellings or sites of 0.5 hectares or more in urban areas and the Barwell and Earl Shilton Sustainable Urban Extensions, and the provision of 40% affordable housing on all sites of 4 or more dwellings or sites of 0.13 hectares or more in rural areas. The tenure split will be 75% social rented and 25% intermediate housing. These figures may be negotiated on a site by site basis taking into account identified local need, existing provision, characteristics of the site and viability.
- 3.2. National Planning Policy Framework, updated in February 2019, has superseded guidance relating to the rural housing targets in Core Strategy policy 15. Paragraph 63 of the NPPF states that affordable housing should only be sought on major developments, except in designated rural areas where a lower threshold may be applied.
- 3.3. Appendix 10 identifies that over the last monitoring period (1 April to 31 March 2019) 99 affordable dwellings have been built all of which were of varied tenures. Table 6 displays the number and type of affordable dwellings provided in the borough from 1 April 2006 to 31 March 2019. Since the start of the plan period (2006) there have been 1155 affordable housing completions, so a considerable number of dwellings have been provided towards meeting the target set in the Core Strategy of 2090 affordable homes to be provided by 2026.

Table 6: Annual affordable housing completions (1 April 2006 – 31 March 2019)

Year	Completions			Total
	Housing Association Rented	Housing Association Shared Equity	Affordable Rent	
2006/07	63	17	N/A	80
2007/08	37	7	N/A	44
2008/09	62	27	N/A	89
2009/10	68	39	N/A	107
2010/11	3	2	N/A	5
2011/12	112	22	0	134
2012/13	17	0	0	17
2013/14	54	18	25	103*
2014/15	81	23	38	154**
2015/16	30	15	8	80***
2016/17	45	25	20	141****
2017/18	0	17	65	102*****
2018/19	18	25	56	99
Total	590	237	212	1155

- * The tenure of 6 affordable housing completions is to be confirmed
 ** The tenure of 12 affordable housing completions is to be confirmed
 *** The tenure of 27 affordable housing completions is to be confirmed
 **** The tenure of 51 affordable housing completions is to be confirmed
 ***** The tenure of 20 affordable housing completions is to be confirmed

4. Housing completions on previously developed / greenfield land

- 4.1. A target of 40% of dwellings on previously developed land (PDL) within the borough has been set through the Core Strategy. Monitoring the development of previously developed land is therefore important to determine whether this target is being met. The breakdown of completions on previously developed land (brownfield land) and greenfield land on major sites (10 dwellings and over) is provided in Table 7.

Table 7: Housing completions on previously developed land and greenfield land (1 April 2009 – 31 March 2019) – major sites only

Year	Greenfield	%	PDL	%	Total
2009/10	148	54	127	46	275
2010/11	106	55	87	45	193
2011/12	165	50	166	50	331
2012/13	119	66	62	34	181
2013/14	294	72	113	28	407
2014/15	422	64	241	36	663
2015/16	303	62	189	38	492
2016/17	174	39	277	61	451
2017/18	167	56	131	44	298
2018/19	222	73	81	27	303
Total	2120	59	1474	41	3594

- 4.2. Within the latest monitoring period of 1 April 2018 to 31 March 2019, of the 297 completions on all major sites, 222 (73%) were on greenfield land and 81 (27%) were on previously developed land. This gives an average of 41% on previously developed land and 59% on greenfield land since 2009.

5. Housing Density

- 5.1. Policy 16 of the Core Strategy requires that proposals for new residential development in the borough meet a minimum net density of at least 40 dwellings per hectare within the urban areas of Hinckley, Burbage, Barwell and Earl Shilton, and a minimum of 30 dwellings per hectare in all other locations. These densities have been used in the SHELAA (with slight local variations where justified).
- 5.2. Information on housing density is only available for large sites. Appendix 11 identifies housing density for major sites (10 dwellings and over) completed between April 2006 and March 2019.
- 5.3. The completed urban sites comprise 3,518 dwellings built on 99.46 hectares of land, giving an average net density of 35.37 dwellings per hectare. The rural sites comprise 1,337 dwellings built on 55.29 hectares of land giving an average net density of 24.18 dwellings per hectare. The urban and rural densities are slightly lower than Core Strategy Policy 16 targets.

6. Further data / contact details

- 6.1. Further data regarding housing can be provided if the request is relevant and reasonable.
- 6.2. For further information please contact the Planning Policy department on 01455 238141 or planningpolicy@hinckley-bosworth.gov.uk.
