# 1. Introduction

---

This Strategic Environmental Assessment (SEA) Screening Statement has been prepared on behalf of Sheepy Parish Council in relation to the Sheepy Parish Neighbourhood Plan (Pre-Submission version April 2021). The first Sheepy Parish Neighbourhood Plan was 'made' by Hinckley and Bosworth Borough Council on 19 March 2019 following a successful local referendum. To make sure the Neighbourhood Plan remains current, the Parish Council has decided to review and update it.

The Parish Council has concluded that some material changes are required to the first Neighbourhood Plan but the broad nature of it should not change. These modifications are incorporated into a Draft version of the revised Neighbourhood Plan.

The purpose of the Screening Statement is to set out a screening opinion in relation to whether a Strategic Environmental Assessment (SEA) process is required to accompany the development of the revised Sheepy Parish Neighbourhood Plan. A Draft version of this Screening Statement was provided to the statutory consultation bodies for SEA (Historic England, the Environment Agency and Natural England) for their opinion.

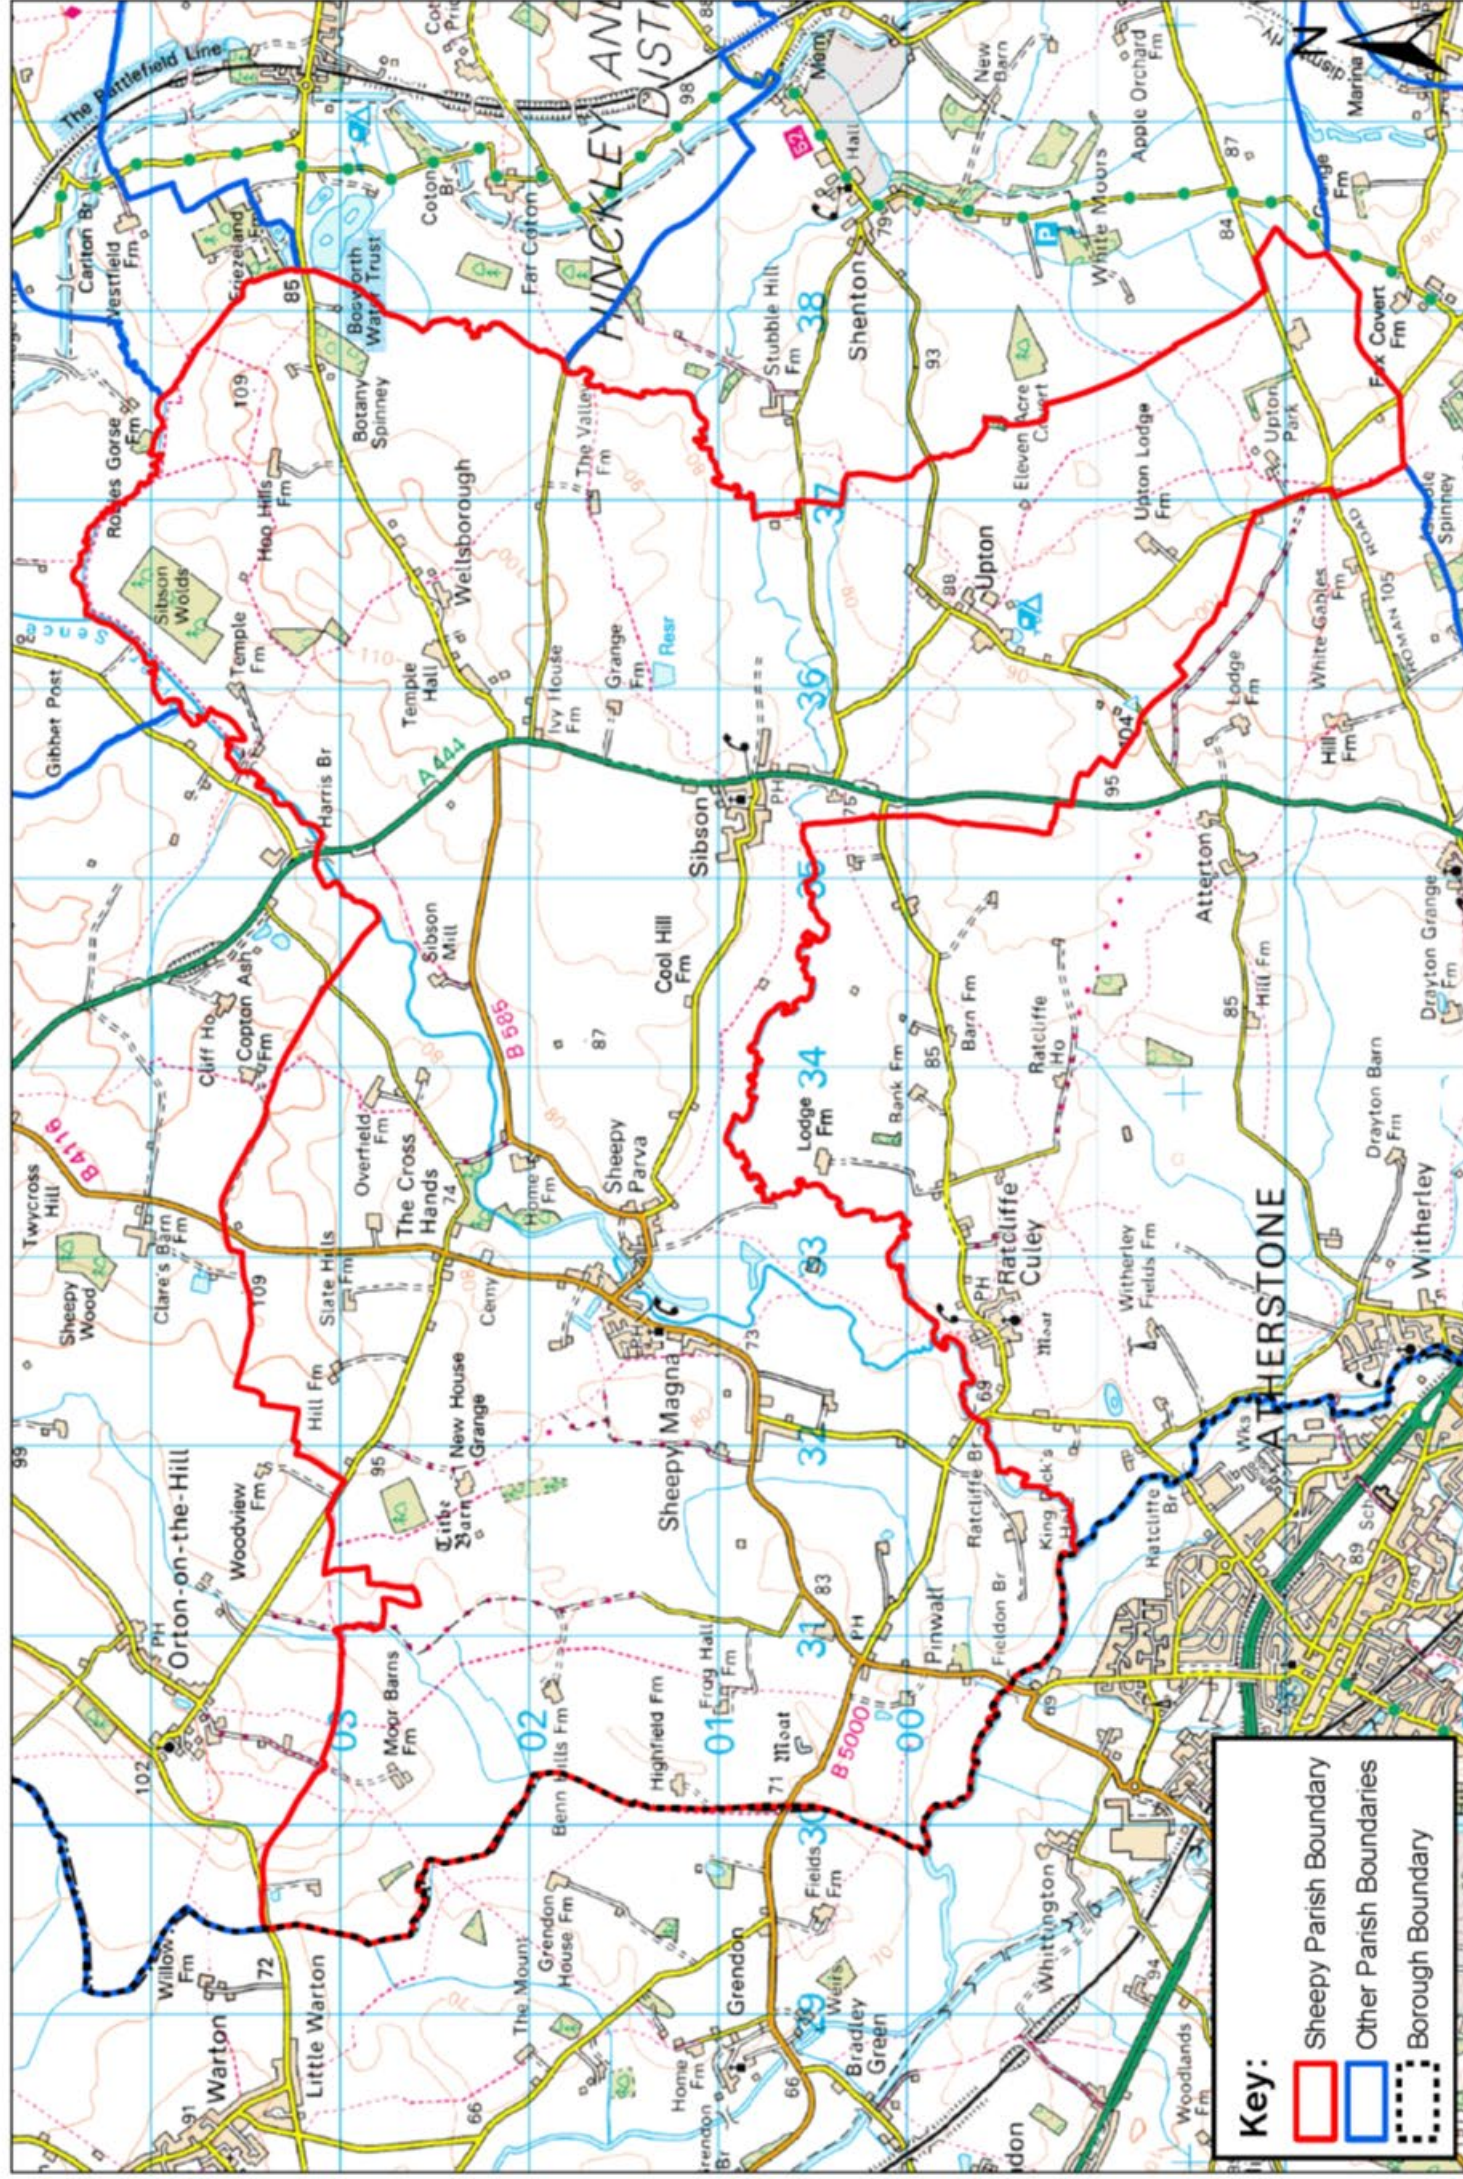

SEA is a systematic process undertaken to evaluate the likely significant environmental effects of plans. The requirement for SEA in England was introduced in 2004 through the Environmental Assessment of Plans and Programmes Regulation 2004 ('The SEA Regulations'), which transposed the European SEA Directive (2001/42/EC).

One of the 'Basic Conditions' that a neighbourhood plan is tested against is whether the making of the neighbourhood plan is compatible with European Union obligations, including obligations under the SEA Directive. Neighbourhood plans only require SEA where they are likely to lead to significant environmental effects. To decide whether a proposed Neighbourhood plan is likely to have significant environmental effects, it should be screened against the criteria set out in Annex 2 of the SEA Directive. Where it is determined that the Neighbourhood plan is unlikely to have significant environmental effects (and, accordingly, does not require SEA), a statement of reasons for this determination should be prepared and published for consultation with the statutory consultation bodies (Natural England, the Environment Agency and Historic England). Where a Neighbourhood plan is likely to have a significant effect on the environment an SEA process must be carried out.

This Screening Statement therefore provides a screening opinion as to whether or not the revised Sheepy Parish Neighbourhood Plan is likely to lead to significant environment effects, and as such requires a SEA process.

The first Sheepy Parish Neighbourhood Plan was not subject to the requirements of Directive 2001/42/EC, the 'SEA Directive' and accompanying regulations.

- Other Parish Boundaries
- Borough Boundary

## 2. Details of the Neighbourhood Plan

### Title of the plan:

Sheepy Parish Neighbourhood Plan.

### Name of Qualifying Body and Local Planning Authority:

The qualifying body preparing the Sheepy Parish Neighbourhood Plan is Sheepy Parish Council. The Local Planning Authority is Hinckley and Bosworth Borough Council.

### Sheepy Parish Neighbourhood Plan contact point:

Parish Clerk  
149 Main Road  
Sheepy Magna  
CV9 3QU

Email: [sheepyparish@gmail.com](mailto:sheepyparish@gmail.com)

### Location and spatial extent of the Sheepy Parish Neighbourhood Plan:

The Sheepy Parish Neighbourhood Plan covers the Sheepy Parish Neighbourhood Area, comprising the parish of Sheepy in south-west Leicestershire.

The Sheepy Parish Neighbourhood Development Plan area is a large rural area, crossed by the River Sence, located on the borders of Leicestershire and North Warwickshire. Its main village is Sheepy Magna, which provides several services. Other settlements include Sibson, with limited services as well as the smaller settlements and grouping of properties at Sheepy Parva, Wellsborough, Upton, Pinwall and The Cross Hands. This area is famous for The Battle of Bosworth Battle Field.

### Timeframe of the Sheepy Parish Neighbourhood Plan:

To 2039.

### Main aims of the Sheepy Parish Neighbourhood Plan:

The main aims of the Sheepy Parish Neighbourhood Plan are as represented in the following diagram:

### Relationship with the Local Plan:

The Sheepy Parish Neighbourhood Plan is being prepared in the context of the Hinckley and Bosworth Local Plan. For the purposes of the Sheepy Parish Neighbourhood Plan, the relevant parts of the Local Plan 2006-2026 (formerly LDF) are the Core Strategy Development Plan Document (DPD) and the Site Allocation and Development Management Policies DPD.

The Hinckley and Bosworth Core Strategy was adopted in December 2009. It provides the vision and spatial strategy for Hinckley and Bosworth Borough. It also identifies development requirements for key Rural Villages and Rural Hamlets. Sheepy Magna is identified as a Rural Village and Sibson as a Rural Hamlet. There are limited services within Sheepy Parva, Wellsborough, Upton, Pinwall and The Cross Hands and the Core Strategy does not identify specific requirements for these small settlements and grouping of properties.

The Site Allocation and Development Management Policies DPD was adopted in 2016 and identifies sites for uses such as housing, employment, retail, open space and community facilities that will deliver the aims, vision and objectives of the Core Strategy. It also contains development management policies which will be used to assess planning applications over the plan period.

A parallel process of Sustainability Appraisal (SA) was undertaken alongside the plan-making process for these two documents.

Given the importance of having an up-to-date local plan, work on the new Hinckley and Bosworth Local Plan began in early 2017. The new Local Plan will set out the overall development strategy for Hinckley and Bosworth Borough for the period up to 2039. It will include strategic policies and allocate sites to meet identified development needs. It will also provide appropriate policies and guidance by which to determine planning applications. The intention is for Hinckley and Bosworth Borough Council to consult on a draft Local Plan in April 2021 and then submit the plan for examination in September 2021. It aims to have a new local plan adopted by October 2022. The Sheepy Parish Neighbourhood Plan has taken account of the emerging Local Plan and following discussions with the Borough Council, the Neighbourhood Plan has been aligned to cover the period 2020 to 2039.

### Will the Sheepy Parish Neighbourhood Plan propose allocations? And if so, will these be over and above those likely to be included in the Local Plan?

The Core Strategy identifies Sheepy Magna as a 'Rural Village' where at least 20 new homes are to be located over the plan period 2006 – 2026. The Site Allocation and Development Management Policies DPD subsequently allocated the site at Trouts Pond Farm, Sheepy Magna for the development of 15 houses. The Core Strategy also supports housing development within the settlement boundary.

Since 2006, 54 houses have been built in the Parish (to 31 March 2020). 42 of these homes have been built in Sheepy Magna with 24 homes built at the site allocated at Trouts Pond Farm. It means that the Core Strategy minimum housing allocation for Sheepy Magna has been significantly exceeded.

A further 28 dwellings had planning permission at 1 April 2020 that are likely to come forward. 19 of these are to be at Hornsey Rise Memorial Site, Wellsborough. The total housing supply is therefore 82 dwellings – well in excess of the notional housing need for the Parish to 2039.

As such the Sheepy Parish Neighbourhood Plan only allocates this one site for development (Policy S13) and provides principles to guide the development of this site, which would comprise brownfield development. Although development has commenced on this site Policy S13 seeks to ensure that any variations to the development stick to the key guiding principles.

## What are the key environmental assets (including 'sensitive areas') near the Sheepy Parish Neighbourhood Area?

### 'Sensitive areas'

A key determinant of whether effects are likely to be significant is the sensitivity of the asset affected. In this context, the more environmentally sensitive a location, the more likely it is that potential environmental effects from a plan will be significant.

National Planning Practice Guidance provides guidance on this topic through providing a list of sites and areas which should be deemed as 'sensitive areas' for the purposes of environmental assessment. These comprise:

- Natura 2000 sites;
- Sites of Special Scientific Interest (SSSI);
- National Parks;
- Areas of Outstanding Natural Beauty;
- World Heritage Sites; and
- Scheduled Monuments.

In the context of the categories of 'sensitive areas' described by the Planning Practice Guidance, the following sites and areas exist within or near the Neighbourhood Area.

### *Natura 2000 sites*

#### *Within the Neighbourhood Area:*

No Special Areas of Conservation (SACs) or Special Protection Areas (SPAs) are present within the Neighbourhood Area.

#### *Within 10km of the Neighbourhood Area*

The nearest is the River Mease Special Area of Conservation which is located approximately 6.5km from the northern boundary of the Sheepy Parish Neighbourhood Area.

The River Mease and the lower part of Gilwiskaw Brook are designated as a SAC. They were designated because the River Mease represents one of the best examples of an unspoilt meandering lowland river which supports characteristic habitats and species and supports populations of spined loach and bullhead, two notable species of native freshwater fish that have a restricted distribution in England. The rivers also support populations of white-clawed crayfish, otter and a range of river plants such as water crow-foot.

Ensor's Pool Special Area of Conservation is located approximately 7.3km from the southern boundary of the Sheepy Parish Neighbourhood Area. This lowland site in Central England represents and qualifies as a SAC as it holds a large population of white-clawed crayfish in standing water. This waterbody is isolated from river systems and is a good example of a 'refuge' site.

All SCA's are also notified as SSSI's, being sites that are of specific biological or geological features.

The nearest SPA is at Rutland Water and is 49km east of the Neighbourhood Area.

### *SSSIs*

#### *Within the Neighbourhood Area*

##### **Sheepy Fields**

Sheepy Fields comprise two hay meadows developed on soils derived from post-glacial river terrace deposits. It contains some of the best remaining examples of neutral grassland in Leicestershire. It is representative of hay meadow plant communities developed on neutral soils in the East Midlands.

The site is well managed and meets favourable condition.

#### *Within 5km of Neighbourhood Area*

##### **Ashby Canal**

The Ashby Canal supports communities of aquatic and emergent plants that are representative of eutrophic standing water bodies in the English lowlands. The diversity of aquatic plants and invertebrates makes this one of the most important water bodies of its type in the East Midlands. The submerged plant community is of particular interest and the floating plant community is also well developed. The canal also supports populations of the native freshwater crayfish and of the water shrew.

Condition: Unfavourable – no change

675m from the most northern part of the boundary of the Neighbourhood Area.

##### **Kendall's Meadow**

A traditionally managed hay meadow with a diversity and richness of plant life unmatched in the south west of the County, an area otherwise sparse in interest. It is probably the best representative of this grassland community type in the central East Midlands. More than a dozen grass species have been found on this meadow which lies partly on alluvium and partly on boulder clay.

Condition: Favourable

738m from the east boundary of the Neighbourhood Area.

##### **Birches Barn Meadows**

Birches Barn Meadows comprises two unimproved fields adjacent to the south bank of the River Anker. They have been managed as hay meadows since 1913. The meadows are on alluvium and overlie Keuper sandstone with ridge and furrow topography in part. Birches Barn Meadows are now the last remaining flood meadows in the Anker valley. The sward associated with the meadow foxtail-great burnet community characteristic of the site, is species-rich with a great diversity of herbs. Eighteen species of grass have been recorded. Two species of bird that breed in the meadows, the quail and curlew are restricted to few other localities in Warwickshire.

Condition: Favourable

1.31km from the western boundary of the Neighbourhood Area

##### **Alvecote Pools**

This site is managed as a nature reserve and consists of a series of shallow pools which have arisen as a result of colliery subsidence. This site is one of the most extensive and diverse wetland areas in the county of Warwickshire and supports a regionally important bird community. As well as open waters there is a wide variety of other habitats present. These include fen, bog, weed bed, alder/willow carr, scattered woodland, pasture and

areas of colliery waste. In the open waters are numerous aquatic plants. This site has one of the most extensive species lists for plants and animals, collected over many years, in the West Midlands.

Condition: Part Favourable/Part Unfavourable – recovering

3.2km from the western boundary of the Neighbourhood Area.

#### **Bentley Park Wood**

This site is a large and important ancient woodland in north Warwickshire. There is an unusual and widespread juxtaposition of sessile oak and alder and there is a wider ecological range of alder woodland than possibly any other wood in Britain. The wood supports a sizeable bird community and is one of the three localities in the county for breeding redstart.

Condition: Favourable

3.3km from the southern boundary of the Neighbourhood Area.

#### **Newton Burgoland Marshes**

This site includes some of the best remaining examples of neutral alluvial grassland and marsh in Leicestershire. The vegetation of the site, which is located in two separate areas, has developed on alluvial soil. The northern area comprises marsh and wet grassland characteristics. The southern area of the site comprises grasslands representative of better drained alluvial soils.

Condition: Part Favourable/Part Unfavourable – recovering

4.5km from the northern boundary of the Neighbourhood Area

#### *National Parks*

##### *Within the Neighbourhood Area*

None.

##### *Near the Neighbourhood Area*

None- the closest National Park is the Peak District National Park (located 47.8km from the Parish).

#### *Areas of Outstanding Natural Beauty*

##### *Within the Neighbourhood Area*

None.

##### *Near the Neighbourhood Area*

None- the closest AONB is the Cannock Chase AONB (located 24.7km from the Parish).

#### *World Heritage Sites*

##### *Within the Neighbourhood Area*

None.

##### *Near the Neighbourhood Area*

None- the closest site is the Derwent Valley Mills World Heritage Site (located 32km from the Parish).

#### *Scheduled Monuments*

##### *Within the Neighbourhood Area*

**Moated site north west of Pinwall**

The moated site north-west of Pinwall survives well and has important connections with Merevale Abbey in Warwickshire. It is considered that the moat island contains the foundations of monastic grange buildings.

#### **Barn at New House Grange**

This large medieval aisled barn is said “to have been the storehouse for the Leicestershire portion of the produce belonging to Merevale Abbey. The barn is timber framed largely with 18th-19th century brick filling.

#### *Near the Neighbourhood Area*

##### **Moat and fishponds at Ratcliffe Culey**

The moat at Ratcliffe Culey is an above average example of a medieval manorial site with contemporary fishponds. Both the fishponds and moat survive in good condition and the moat island has considerable potential for preserving evidence of the original manor house.

330m south of the Neighbourhood Area.

##### **Moated site and fishponds NNW of St James’ Church, Tywcross**

This monument includes two separate areas; the first containing a moat and fishpond, and the second situated 100m to the north containing two fishponds. The moat and fishponds survive well. The earthworks are well defined and the monument is of high archaeological potential due both to the lack of disturbance and to waterlogging in part of the moat and one of the ponds providing conditions to the preservation of organic remains.

1.5km north of Neighbourhood Area

##### **Merevale Abbey, a Cistercian monastery, associated water features and industrial remains, Merevale**

This monument includes two areas at the junction of two small valleys. It is a well-documented example of a Cistercian monastery founded in the mid-12<sup>th</sup> Century. The central part of the monument includes the ruins of two conventual buildings, which are Listed Grade II and II\* and buried remains associated with the core of the monastery. It also includes earth remains of buildings and other features within the monastic precinct, parts of a monastic water system and early industrial remains. The remains illustrate the development of the monastery and will preserve rich evidence of the changing lifestyle of monks.

1.8km south west of Neighbourhood Area

##### **Roman Foundation east of Barton Road, Market Bosworth**

The site was excavated in the 1960s. Part of a mosaic pavement was uncovered and various finds (pottery, building materials, coins, querns etc) were found. Geophysical survey recorded a large ditch with at least three structures to the east of it.

2.4km east of Neighbourhood Area

##### **Motte and associated earthworks at Shackerstone**

The motte, together with a fishpond, survive in good condition and apart from some small excavation, the mound is essentially undisturbed and has considerable potential for the survival of archaeological evidence. It was later incorporated into a formal garden, some earthworks of which are included in the scheduling. Motte castles are medieval fortifications introduced in Britain by the Normans.

2.5km north of Neighbourhood Area

**Manduessedum Roman Villa and settlement with associated industrial complex, Mancetter**

Mancetter was an important location during the Roman period and Manduessedum is particularly important because of the survival of a large number of Roman features. It provides an insight into some of the more scarce and less well recognised elements of the Roman occupation of Britain.

2.8km south of Neighbourhood Area

**Roman Camp, Mancetter**

Part of a series of Roman vexillation fortresses surrounding Mancetter Farm. This monument, which falls into three areas, comprises fortresses and camps which survive entirely of buried structures. Documentary evidence indicates at least one of the fortresses was connected with Boudicca's last battle in 60 AD.

2.8km south of Neighbourhood Area

**Ambion deserted medieval village, Sutton Cheney**

The site is adjacent to the site of the battle of Bosworth and includes the earthwork remains of a deserted medieval village. A number of house platforms can be identified. Ambion Hill was the site of Richard III's camp before the Battle of Bosworth in 1485 but there is no archaeological evidence of this on the site.

2.9km east of Neighbourhood Area

**Polesworth Bridge, Polesworth**

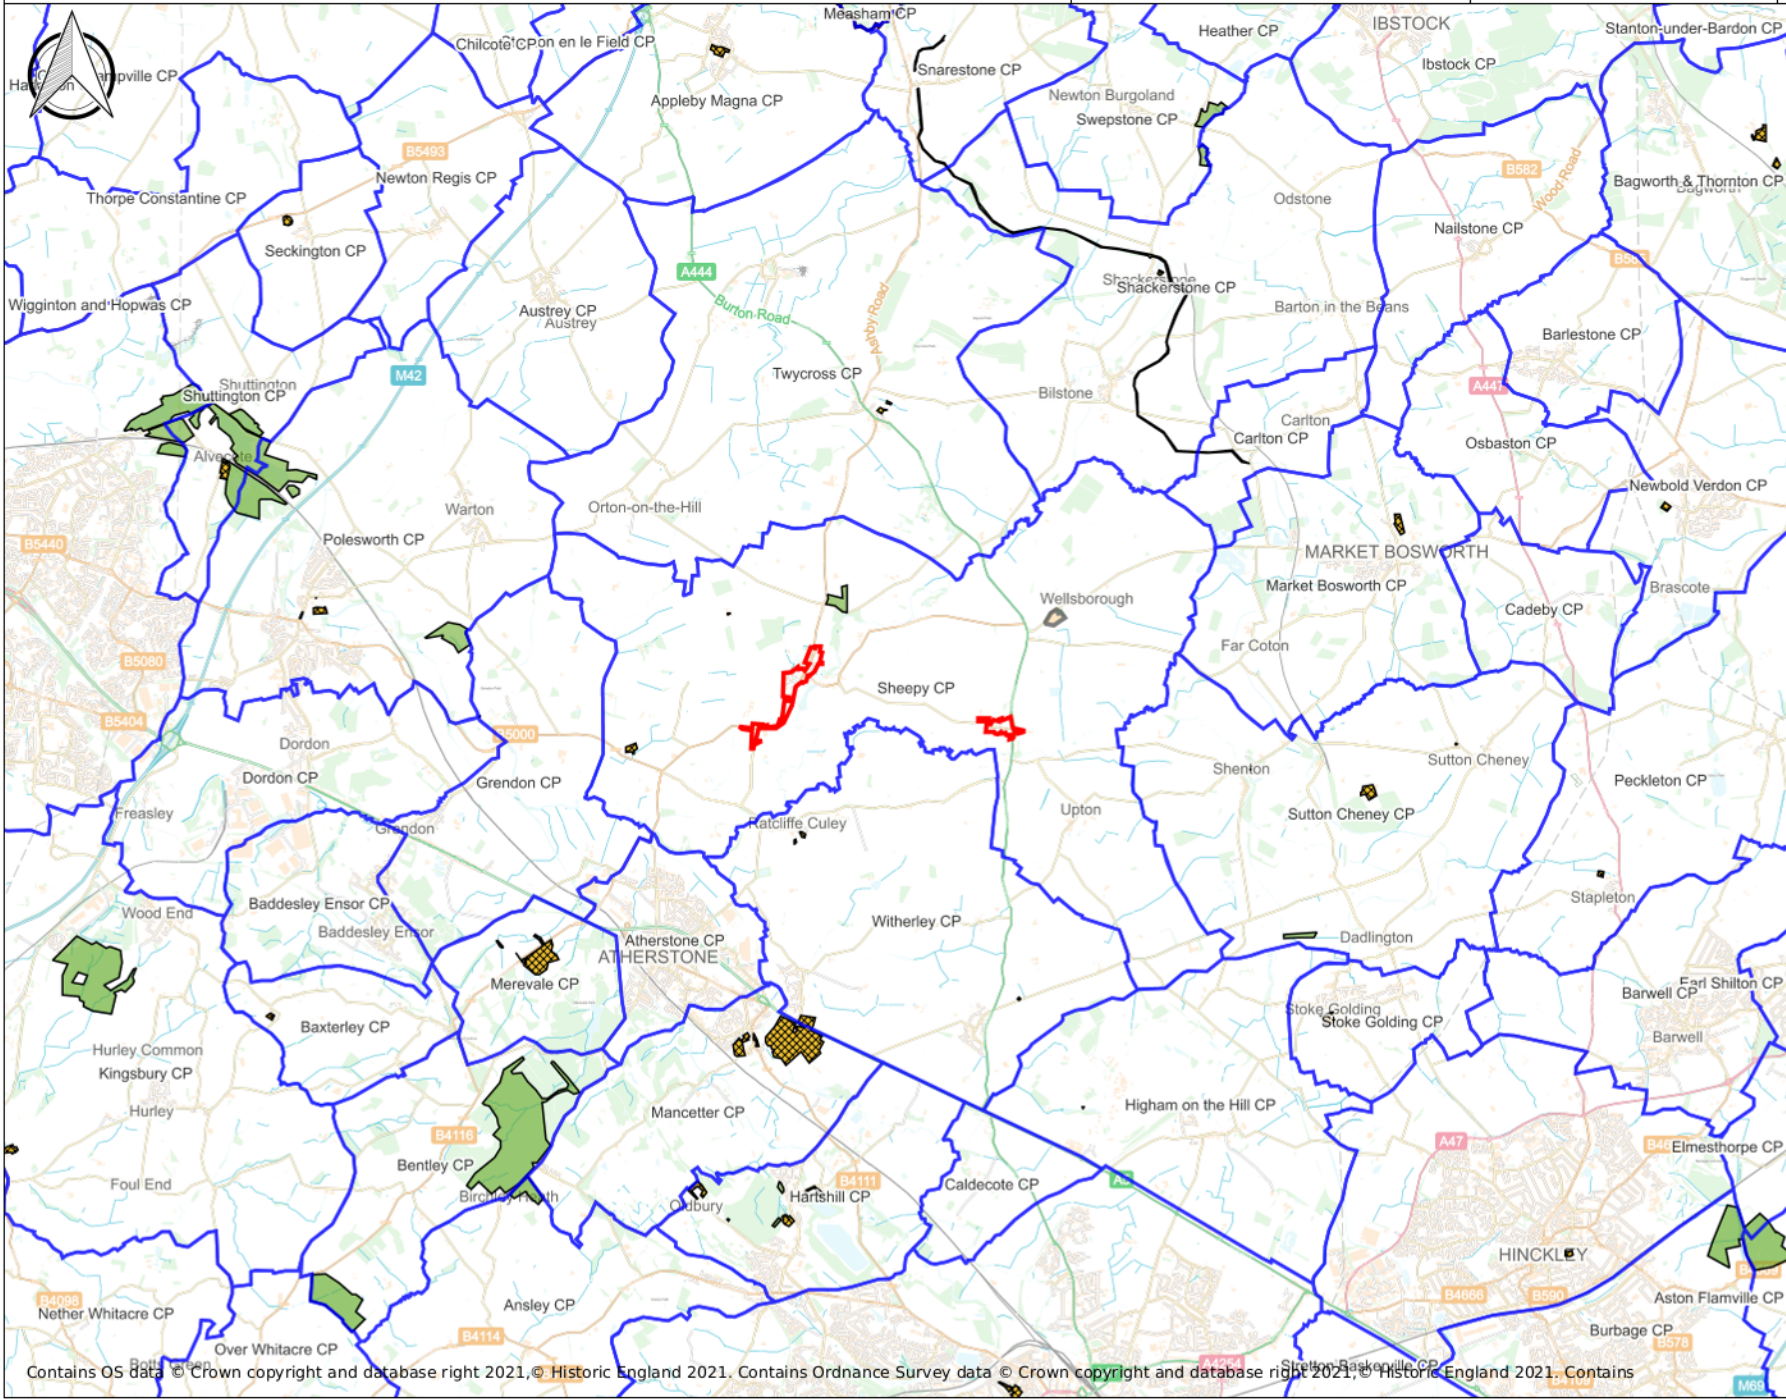

This bridge is also a Grade II Listed Structure and was first built in the medieval period.

2.9km west of the Neighbourhood Area

- II\*

Parks and Gardens

### *Other key environmental assets*

Other designated environmental assets located within the Neighbourhood Area (i.e. those which are not defined as 'sensitive areas' as defined by the Planning Practice Guidance) include as follows:

#### *Historic Park and Gardens*

There are no Historic Parks or Gardens in Sheepy Parish. The closest is Merevale Hall, a Grade II\* Historic Park and Garden, 1.4km south-west of the Neighbourhood Area.

#### *Battle of Bosworth (Field) 1485*

The registered battlefield site is located across five Parishes including Sheepy. It is located within the south eastern part of Sheepy Parish. It is registered due to its historical importance, topographic integrity, archaeological potential and technological significance.

#### *Conservation Areas*

Sibson Conservation Area was designated by Hinckley and Bosworth Borough Council in December 1995. The Conservation Area covers most of the village.

The character of the village is derived from its agricultural origins of the settlement. This can be identified from the number of former and existing farm buildings within the designated area. The ancient road pattern, with its unique twists and turn, has added a further layer of distinctiveness to the village. There are four listed buildings in the Conservation Area.

#### *Listed buildings*

There are 25 buildings in Sheepy Parish listed by Historic England for their special architectural or historic interest. They include the Grade II\* Church of All Saints and the Great Barn at New House Grange, in Sheepy Magna and the Grade II\* Church of St Botolph in Sibson. There are no Grade I listed buildings and the remainder are Grade II listings.

### 3. Legislative Background

The basis for Strategic Environmental Assessments and Sustainability Appraisal legislation is European Directive 2001/42/EC which was transposed into English law by the Environmental Assessment of Plans and Programmes Regulations 2004, or SEA Regulations. Detailed Guidance of these regulations can be found in the Government publication 'A Practical Guide to the Strategic Environmental Assessment Directive' (ODPM 2005).

Schedule 2 of the Neighbourhood Planning (General) Regulations 2012 makes provision in relation to the Habitats Directive. The Directive requires that any plan or project, likely to have a significant effect on a European site, must be subject to an appropriate assessment. To achieve this, paragraph 1 prescribes a basic condition that the making of a neighbourhood plan is not likely to have a significant effect on a European site or a European offshore marine site. Paragraphs 2 to 5 of the Schedule amend the Conservation of Habitats and Species Regulations 2010 so as to apply its provisions to neighbourhood development orders and neighbourhood plans. In particular, paragraph 4 inserts new regulation 78A which provides that a neighbourhood development order may not grant planning permission for development which is likely to have a significant effect on a European site or a European offshore marine site.

Schedule 3 of the Neighbourhood Planning (General) Regulations 2012 makes provision in relation to the Environmental Impact Assessment (EIA) Directive. The Directive requires that EIA development must be subject to a development consent process. To enable this, Schedule 3 prescribes a basic condition that applies where development which is the subject of a proposal for a neighbourhood development order is of a type caught by the EIA Directive, and applies the relevant provisions of the Town and Country Planning (Environmental Impact Assessment) Regulations 2011(3) ("the EIA Regulations") with appropriate modifications (regulation 33 and paragraphs 1 to 4 and 6 of Schedule 3). Paragraphs 5 and 7 to 13 of Schedule 3 correct errors in the EIA Regulations.

It may be appropriate, and in some cases a requirement, that the statutory environmental bodies of Historic England, the Environment Agency and Natural England be consulted, for example, a draft neighbourhood plan proposal must be assessed to determine whether it is likely to have significant environmental effects.

There is no legal requirement for a neighbourhood plan to have a sustainability appraisal as set out in section 19 of the Planning and Compulsory Purchase Act 2004. However, a qualifying body must demonstrate how its plan or order will contribute to achieving sustainable development.

This report focuses on screening for SEA and the criteria for establishing whether a full assessment is needed considering the Sustainability Appraisal and Strategic Environmental Assessment undertaken for the Hinckley and Bosworth Core Strategy 2006-2026 in 2010 and the Sustainability Appraisal and Strategic Environmental Assessment for the Site Allocations and Development Management Policies 2006-2026 in 2014 and 2016.

#### 4. Criteria for Assessing the Effects of Neighbourhood Plans (the ‘plan’)

Criteria for determining the likely significance of effects referred to in Article 3(5) of Directive 2001/42/EC are set out below:

1. The characteristics of neighbourhood plans (“plan”), having regard, in particular, to - the degree to which the plan sets a framework for projects and other activities, either with regard to the location, nature, size and operating conditions or by allocating resources, - the degree to which the plan influences other plans and programmes including those in a hierarchy, - the relevance of the plan for the integration of environmental considerations in particular with a view to promoting sustainable development, - environmental problems relevant to the plan, - the relevance of the plan for the implementation of community legislation on the environment (e.g. plans and programmes linked to waste-management or water protection).

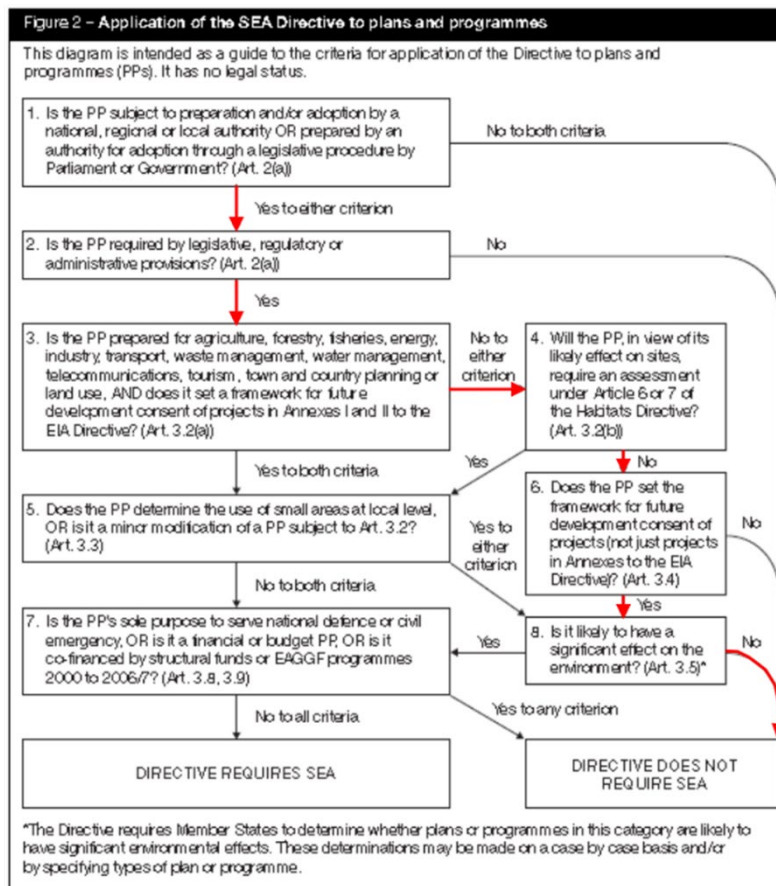

2. Characteristics of the effects and of the area likely to be affected, having regard, in particular, to - the probability, duration, frequency and reversibility of the effects, - the cumulative nature of the effects, - the trans boundary nature of the effects, - the risks to human health or the environment (e.g. due to accidents), - the magnitude and spatial extent of the effects (geographical area and size of the population likely to be affected), - the value and vulnerability of the area likely to be affected due to: - special natural characteristics or cultural heritage, - exceeded environmental quality standards or limit values, - intensive land-use, - the effects on areas or landscapes which have a recognised national, Community or international protection status.

Source: Annex II of SEA Directive 2001/42/EC

## 5. Assessment

This diagram shows the Directive's field of application in the form of a diagram. The original diagram is from 'A Practical Guide to the Strategic Environmental Objective'. The red arrows indicate the process route for the Sheepy Parish Neighbourhood Plan SEA Screening Assessment.

The table below shows the assessment of whether the Sheepy Parish Neighbourhood Plan will require a full SEA. The questions below are drawn from the diagram above which sets out how the SEA Directive should be applied.

Stage	Yes/No	Reason
1. Is the Neighbourhood Plan subject to preparation and/or adoption by a national, regional or local authority OR prepared by an authority for adoption through a legislative procedure by Parliament or Government? (Art. 2(a))	Yes	The preparation of and adoption of the Sheepy Parish Neighbourhood Plan is allowed under The Town and Country Planning Act 1990 as amended by the Localism Act 2011. The Sheepy Parish Neighbourhood Plan will be prepared by Sheepy Parish Council (as the 'relevant body') and will be 'made' by Hinckley and Bosworth Council as the local authority. The preparation of neighbourhood plans is subject to the following regulations: The Neighbourhood Planning (General) Regulations 2012 and The Neighbourhood Planning (referendums) Regulations 2012.
2. Is the Neighbourhood Plan required by legislative, regulatory or administrative provisions? (Art. 2(a))	Yes	Whilst the Sheepy Parish Neighbourhood Plan is not a requirement and is optional under the provisions of The Town and Country Planning Act 1990 as amended by

Stage	Yes/No	Reason
		the Localism Act 2011, it will if 'made', form part of the Development Plan for the District. It is therefore important that the screening process considers whether it is likely to have significant environmental effects and hence whether SEA is required under the Directive.
<b>3. Is the Neighbourhood Plan prepared for agriculture, forestry, fisheries, energy, industry, transport, waste management, water management, telecommunications, tourism, town and country planning or land use, AND does it set a framework for future development consent of projects in Annexes I and II (see Appendix 2) to the EIA Directive? (Art 3.2(a))</b>	<b>No</b>	Whilst the Sheepy Parish Neighbourhood Plan covers a range of land use issues and allocations, it does not set the framework for future development consent of projects in Annexes I and II to the EIA Directive (see Appendix 2 for list). Instead, the Sheepy Parish Neighbourhood Plan is a non-strategic scale document, focused solely upon the Parish of Sheepy.
<b>4. Will the Neighbourhood Plan, in view of its likely effect on sites, require an assessment for future development under Article 6 or 7 of the Habitats Directive? (Art. 3.2 (b))</b>	<b>No</b>	<p>The Sheepy Parish Neighbourhood Plan is unlikely to have a substantial effect on the Natura 2000 network of protected sites.</p> <p>The two nearest SACs – the River Mease Catchment to the north east of the Parish and Ensors Pools to the south west of the Parish- are both within 10km of the Sheepy Parish Neighbourhood Area. There are no SPAs within 10km of the Neighbourhood Area.</p> <p>The Hinckley and Bosworth Sustainability Appraisal Scoping Report 2017 confirms there is no physical connection between the Borough and The Ensor's Pool SAC. From this we consider that activities within the Borough – and indeed the Sheepy Parish Neighbourhood Area - would not have implications for this site.</p> <p>Part of the River Mease (not the part defined as a European site (SAC)) passes through the Borough coming in from Snarestone over the border of Hinckley and Bosworth Borough Council, flowing shortly after towards Sweptstone. In addition, three tributaries of the river flow</p>

Stage	Yes/No	Reason
		<p>down towards and through Norton juxta Twycross, ending to the east, west and north of Norton juxta Twycross. As a result, given the physical connection to the River Mease SAC, provided by its flow through the Borough and via these tributaries, it might be conceivable that some areas of the Borough could have an impact on this site despite the actual designation being outside the Borough.</p> <p>However, no part of the River Mease or its tributaries as described above flow through the Sheepy Parish Neighbourhood Area. The tributaries as described above are located roughly 3km away from the closest part of the Sheepy Parish Neighbourhood Area boundary. In view of this as well as considering the scope of proposals within the draft Sheepy Parish Neighbourhood Plan, the Borough Council considers that further stages in the HRA process are not required (including further screening, or Appropriate Assessment) and that the Sheepy Parish Neighbourhood Plan is not considered to have any impact on the Natura 2000 network of protected sites.</p>
<b>5. Does the Neighbourhood Plan determine the use of small areas at local level, OR is it a minor modification of a PP subject to Art. 3.2? (Art. 3.3)</b>	<b>Yes</b>	Determination of small sites at local level only.
<b>6. Does the Neighbourhood Plan set the framework for future development consent of projects (not just projects in annexes to the EIA Directive)? (Art 3.4)</b>	<b>Yes</b>	The Sheepy Parish Neighbourhood Plan is to be used for determining future planning applications
<b>7. Is the Neighbourhood Plan's sole purpose to serve the national defence or civil emergency, OR is it a financial or budget PP, OR is it co-financed by structural funds or EAFF programmes 2000 to 2006/7? (Art 3.8, 3.9)</b>	<b>No</b>	No further comments

Stage	Yes/No	Reason
8. Is it likely to have a significant effect on the environment? (Art. 3.5)	No	Appendix 1 presents the environmental effects which have the potential to arise as a result of the Sheepy Parish Neighbourhood Plan.

## 6. Summary of screening determination

This determination has considered whether the Sheepy Parish Neighbourhood Plan is likely to lead to significant environmental effects as defined by Directive 2001/42/EC, the 'SEA Directive' and the transposing regulations. In particular, the review has considered sensitive areas located in the vicinity of the Neighbourhood Area and the potential environmental effects on these areas that may arise as a result of the Sheepy Parish Neighbourhood Plan.

Whilst environmental effects have the potential to take place as a result of the Sheepy Parish Neighbourhood Plan, including in relation to the majority of the SEA 'topics', it is considered that these are unlikely to be significant in the context of the SEA Directive. This SEA screening opinion provides the necessary analysis relating to the potential for negative effects on the nearby SSSIs, Scheduled Monuments, Listed Buildings and the Sibson Conservation Area.

### Habitats Regulation Assessment

It is the opinion of Hinckley & Bosworth Borough Council that a full Habitats Regulations Appropriate Assessment of the Sheepy Parish Neighbourhood Plan is not required, as it is unlikely to have a significant effect on any designated sites.

### Conclusion

This screening opinion has been prepared in order to fulfil the statutory SEA requirements, as set out in the Environmental Assessment of Plans and Programmes Regulations 2004. The environmental consultation bodies Historic England, Natural England and the Environment Agency have been consulted during the preparation of the SEA Screening Statement. Their responses are summarised below:

- Historic England - Thank you for your consultation of 19 August 2021 and the request for a Screening Opinion in respect of the Sheepy Neighbourhood Plan. For the purposes of consultations on SEA Screening Opinions, Historic England confines its advice to the question, "Is it likely to have a significant effect on the environment?" in respect of our area of concern, cultural heritage. Our comments are based on the information supplied with the screening request.

On the basis of the information supplied and in the context of the criteria set out in Schedule 1 of the Environmental Assessment Regulations [Annex II of 'SEA' Directive], Historic England is of the view that the preparation of a Strategic Environmental Assessment is not likely to be required.

- Natural England - Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced and managed for the benefit of present and future generations, thereby contributing to sustainable development. We can confirm that it is considered unlikely that any significant environmental effects will result from the implementation of the Sheepy Neighbourhood Plan. Natural England also agrees with the report's conclusions that Sheepy Neighbourhood Plan would not be likely to result in a significant effect on any European Site either alone or in combination and therefore no further assessment work under the Habitats Regulations would be required.

- Environment Agency - Based on the submitted information we have no comments to make on whether an SEA is required.

A full copy of the responses received are attached as Appendix 3.

For the above reasons, it is considered that the Sheepy Parish Neighbourhood Plan is not subject to the requirements of Directive 2001/42/EC, the 'SEA Directive' and accompanying regulations.

## Appendix 1: Assessment of potential environmental effects

The following table presents the environmental effects which have the potential to arise because of the Sheepy Parish Neighbourhood Plan. This is accompanied by a commentary on whether these effects are likely to be significant. The environmental effects have been grouped by the SEA 'topics' suggested by Annex I(f) of the SEA Directive.

SEA Topic	Likely effect? Y/N	Description of effect	Effect likely to be significant in the context of SEA?
<b>Biodiversity, flora and fauna</b> (Including biodiversity habitats and species, biodiversity sites, areas of geological interest)	Y	Without mitigation and enhancement measures, new allocations in Sheepy Parish have the potential to lead to effects on biodiversity, including through loss of habitat, disturbance, effects on ecological connections and indirect effects such as from impacts on water quality and quantity.	<p>There are no Special Areas of Conservation (SACs) or Special Protection Areas (SPA) present within the Neighbourhood Area. As concluded in Section 5 of the above assessment, the Sheepy Parish Neighbourhood Plan would not have implications for The Ensors Pool SAC or The River Mease SAC. As such the contents of the Sheepy Parish Neighbourhood Plan is not considered to have an impact on the Natura 2000 network of protected sites.</p> <p>In relation to biodiversity, the main 'sensitive areas' near the Neighbourhood Area are the seven SSSIs described in Section 2.</p> <p>The two closest SSSIs to the site at Hornsey Rise Memorial Home, Wellsborough are Sheepy Fields (favourable condition) and Ashby Canal (Unfavourable condition). These lie within 2.6km and 2.7km respectively of this allocated housing site.</p> <p>Wellsborough and the housing allocated site lie within the outer zone of the SSSI Impact Risk Zone for Ashby Canal. Certain developments within this 'zone' require consultation with Natural England, namely airport, helipads and other aviation proposals, quarry development, pig and poultry units, industrial and commercial development that causes air pollution, general combustion processes and development that discharges more than 5,000 litres of water per day. The housing allocation (which has the benefit of planning permission) at Hornsey Rise Memorial Home therefore does</p>

SEA Topic	Likely effect? Y/N	Description of effect	Effect likely to be significant in the context of SEA?
			<p>not require consultation with Natural England due to the nature of the development proposed.</p> <p>The site at Hornsey Rise Memorial Home being considered for allocation through the Sheepy Parish Neighbourhood Plan only has the potential to deliver 20 dwellings. Potential significant effects resulting from the Sheepy Parish Neighbourhood Plan housing allocation are also likely to be avoided by the current policy approach proposed for the site by the Sheepy Parish Neighbourhood Plan. Policy S13 specific to the housing allocation seeks to improve biodiversity and include the retention and enhancement of trees and hedgerows along the site boundaries. In addition, the overarching biodiversity policy seeks to ensure that new development maintains and enhances existing ecological corridors and landscape features for biodiversity, and seeks an overall biodiversity net gain.</p> <p>In terms of the remaining SSSIs, due in part to the relative distance of the sites, no parts of Wellsborough are within Impact Risk Zones for the five SSSIs.</p> <p>This reduces the likelihood of significant effects on these 'sensitive areas'.</p> <p><b>Effects on biodiversity are therefore unlikely to be significant</b> if the current policy approach proposed in relation to 'Hornsey Rise Memorial Home' allocation are taken forward.</p>
<b>Population</b> (Including residents' quality of life, accessibility to services and facilities, deprivation and similar)	Y	As indicated by the current policy approaches proposed for the Sheepy Parish Neighbourhood Plan, the Plan has the potential to have a range of benefits for the quality	Whilst the benefits for residents of Sheepy Parish from a well-designed neighbourhood plan have the potential to be wide-ranging, these are <b>not deemed to be significant</b> in the context of the SEA Directive.

SEA Topic	Likely effect? Y/N	Description of effect	Effect likely to be significant in the context of SEA?
		of life of residents and for accessibility to services, facilities and opportunities. It seeks to prevent the loss of community services and facilities. The Sheepy Parish Neighbourhood Plan will also support the delivery of affordable housing for local people and help deliver a range of types and tenures of houses, including the provision of homes for older households and smaller, lower-cost homes.	
<b>Human Health</b> (Incorporating residents' health and wellbeing)	Y	As indicated by the current policy approaches proposed for Sheepy Parish Neighbourhood Plan, the Plan has the potential to have a range of benefits for residents' health and wellbeing through promoting healthier lifestyles and supporting accessibility to services and facilities. Policies include that which support the creation of footpath and cycle links, the protection of local green spaces, and the	Whilst the health and wellbeing benefits for residents of the Neighbourhood Area from a well-designed neighbourhood plan have the potential to be wide-ranging, these are not deemed to be significant in the context of the SEA Directive. Likely effects from noise quality are also <b>not deemed to be significant</b> .

SEA Topic	Likely effect? Y/N	Description of effect	Effect likely to be significant in the context of SEA?
		<p>protection of residential amenities.</p> <p>Direct impacts from the plan on human health from noise quality, air quality and light pollution issues may arise, including from new development areas. The Plan seeks to protect the health and well being of residents from these impacts.</p>	
<b>Soil</b> (Including agricultural land, soil erosion, soil quality)	Y	<p>It is uncertain whether proposed development areas will be sited on land classified as the Best and Most Versatile Agricultural Land, as recent detailed agricultural land classification has not taken place.</p> <p>The Plan seeks to limit development outside of the Sheepy Magna and Sibson Settlement Boundaries. Development of the Hornsey Rise Memorial Home comprises brownfield development.</p>	<p>Due to the relatively limited area of land likely to be developed through the Sheepy Parish Neighbourhood Plan, effects on the soils resource are <b>unlikely to be significant</b>.</p>

SEA Topic	Likely effect? Y/N	Description of effect	Effect likely to be significant in the context of SEA?
<b>Water</b> (Including water quality and availability)	Y	<p>The Sheepy Parish Neighbourhood Plan has the potential to lead to a small-scale increase in water demand in the Neighbourhood Area through supporting the delivery of new housing provision.</p> <p>The Plan also supports development which incorporate Sustainable Drainage Systems (SuDS).</p>	Potential effects on water availability will be limited by the relatively small-scale of proposals likely to be facilitated by the Sheepy Parish Neighbourhood Plan. Effects <b>unlikely to be significant</b> .
<b>Air</b> (Including air quality)	Y	<p>Whilst new development areas in the Neighbourhood Area may lead to increased traffic flows and congestion, this is unlikely to lead to marked effects on air quality. In addition, the Sheepy Parish Neighbourhood Plan includes policy which seeks to restrict adverse impacts from air quality on residential amenity.</p>	No existing air quality issues exist in the Neighbourhood Area and there are no Air Quality Management Areas within the Neighbourhood Area. Any effects on air quality are <b>not deemed to be significant</b> in the context of the SEA Directive.
<b>Climatic Factors</b> (Including relating to climate change mitigation (limiting greenhouse gas emissions) and adaptation (adapting to the	Y	In terms of climate change mitigation, the Sheepy Parish Neighbourhood Plan actively seeks to located new housing development within the	Due to the small scale, local scope of the Sheepy Parish Neighbourhood Plan, the nature and magnitude of effects directly arising as a result of the Sheepy Parish Neighbourhood Plan are <b>unlikely to be significant</b> in the context of the SEA Directive.

SEA Topic	Likely effect? Y/N	Description of effect	Effect likely to be significant in the context of SEA?
anticipated effects of climate change, including flood risk)		defined settlement boundaries of Sheepy Magna and Sibson, where the majority of the local services and facilities are located. This will help limit potential increases in greenhouse gas emissions from an increase in the built footprint of the Neighbourhood Area. New development will also be expected to incorporate Sustainable Drainage Systems which will help meet the challenges of climate change and in terms of climate change adaptation. In addition, new development should be future-proofed with low carbon heating and high levels of energy efficiency. Further detail on such matters is contained the Neighbourhood Plan's Design Code. In addition, statutory requirements (including the requirements of the NPPF) will ensure that flood risk is addressed through new development proposals.	

SEA Topic	Likely effect? Y/N	Description of effect	Effect likely to be significant in the context of SEA?
		The proposed policy approach of the Sheepy Parish Neighbourhood Plan also shows support for the development of suitable renewable energy infrastructure in the form of solar photovoltaic farms.	
<b>Material Assets</b> (Including minerals resources, waste considerations)	Y	The Sheepy Parish Neighbourhood Plan may lead to small increases in the Neighbourhood Area's waste management requirements through supporting the delivery of new housing. No mineral sites or resources are likely to be affected as a result of the Sheepy Parish Neighbourhood Plan.	Potential increases in waste as a direct result of the Sheepy Parish Neighbourhood Plan will be managed through statutory requirements regarding waste management. Due to their limited magnitude, effects are therefore <b>unlikely to be significant</b> in the context of the SEA Directive.
<b>Cultural Heritage</b> (Including historic environment, cultural heritage, historic settings)	Y	The housing allocation proposed through the Sheepy Parish Neighbourhood Plan has the potential to have effects on the fabric and setting of historic environment assets.	<p>Whilst three scheduled monuments (a 'sensitive area' as defined by the Planning Practice Guidance) are located within the Neighbourhood Area, namely the moated site at Pinwall, the Barn at New House Grange and the Battle of Bosworth Field, they are unlikely to be directly affected by the proposed housing development site at Hornsey Rise Memorial Home, Wellsborough due to their relative distance (5.6km, 4.1km and 3.1km respectively) from this site.</p> <p>In terms of the conservation area within the Parish, the proposed site is located approximately 1.4km north of the Sibson Conservation Area and it is unlikely that the proposed</p>

SEA Topic	Likely effect? Y/N	Description of effect	Effect likely to be significant in the context of SEA?
			<p>housing site would have a significant effect on the integrity of this Conservation Area.</p> <p>In terms of the listed buildings present in the Parish the proposed allocation is unlikely to affect the setting of these features of cultural heritage importance, including the three Grade II Listed Buildings in Wellsborough, due to the siting of the proposed allocation in relation to these assets.</p> <p>In addition, planning permission has been granted for the development of this allocation and works have commenced. Neighbourhood Plan policy with respect to this site, is to ensure that any variations to the development stick to key guiding principles and that the identified housing requirement is met.</p> <p>In addition, the Sheepy Parish Neighbourhood Plan focuses on protecting and enhancing the historic environment and key features of historic importance.</p> <p>Therefore, effects are <b>unlikely to be significant</b> in the context of the SEA Directive.</p>
<b>Landscape</b> (Including landscape and townscape quality)	Y	Direct effects from the Sheepy Parish Neighbourhood Plan on landscape and townscape character have the potential to take place from the housing allocation taken forward through the plan.	<p>In terms of landscape quality, no 'sensitive areas' as defined by the NPPG are present in the Neighbourhood Area. The likelihood of significant effects on the integrity of the Conservation Area are also likely to be limited by the implementation of the Design Guide put forward through the Sheepy Parish Neighbourhood Plan, the Plan's focus on protecting and enhancing the historic environment and landscape of the Neighbourhood Area and the Plan's focus on protecting key features of importance for the historic environment. Overall, the Sheepy Parish Neighbourhood Plan's focus on protecting and enhancing the</p>

SEA Topic	Likely effect? Y/N	Description of effect	Effect likely to be significant in the context of SEA?
			<p>landscape/townscape of the Neighbourhood Area and protecting key features of importance for the historic environment will deliver positive effects on landscape and townscape quality and facilitate enhancements.</p> <p>Therefore, potential effects on landscape character and townscape quality are <b>unlikely to be significant</b> in the context of the SEA Directive.</p>

## Appendix 2: Annex I and Annex II Projects, EIA Directive

### Annex I Projects, EIA Directive

All projects listed in Annex I are considered as having significant effects on the environment and require an Environmental Impact Assessment. The listed projects are summarised as follows:

1. Crude oil refineries, coal or shale gasification liquefaction installations
2. Thermal power stations, nuclear power stations, other nuclear reactors etc
3. Installations for the processing, reprocessing, final disposal or storage of irradiated nuclear fuel, or the production or enrichment of nuclear fuel
4. Integrated works for the initial smelting of cast-iron and steel, and the production of non-ferrous crude metals from ore
5. Installations for the extraction, processing and transforming of asbestos
6. Integrated chemical installations for the industrial scale manufacture of basic organic and inorganic fertilisers, plant health products and biocides, pharmaceuticals, and explosives
7. Construction of long-distance railway lines. Airports with a basic runway length run of 2,100 metres or more. Construction of motorways and express roads. New roads of four or more lanes and roads which have been improved so as to convert two lanes or fewer to four lanes or more, where such road would be 10 kilometres or more in continuous length
8. Inland waterways and ports for inland-waterway traffic, trading ports and piers
9. Waste disposal installations for the incineration or chemical treatment of hazardous waste
10. Waste disposal installations for the incineration or chemical treatment of non- hazardous waste
11. Groundwater abstraction or artificial groundwater recharge schemes
12. Water transfer schemes between river basins
13. Wastewater treatment plants
14. Commercial extraction of petroleum and natural gas
15. Dams and water storage installations
16. Gas, oil or chemical pipelines and pipelines used for the transport of carbon dioxide for geological storage

## Annex II Projects, EIA Directive

For the projects listed in Annex II the national authorities have to decide whether an Environmental Impact Assessment is needed. The projects listed in Annex II are in general those not included in Annex I but also other types such as urban development projects and flood-relief works. The listed projects are summarised as follows:

1. Agriculture, silviculture\* and aquaculture restructuring of rural land holdings; use of uncultivated land or seminatural areas for intensive agriculture; water management projects for agriculture; initial afforestation\* and deforestation\* for the purpose of conversion to a different land use; intensive livestock installations (projects not included in Annex I); intensive fish farming; reclamation of land from the sea.
2. Extractive industry Quarries, open-cast mining, peat extraction (projects not included in Annex I); underground mining; dredging; deep drilling; surface installations for coal, gas, ore and shale extraction.
3. Energy industry Installations for production of electricity, steam and hot water and for carrying gas, steam and hot water, and transmission of electricity by overhead cables\* (projects not included in Annex I); surface storage of natural gas and fossil fuels; underground storage of combustible gases; briquetting of coal and lignite; installations for processing and storage of radioactive waste (unless included in Annex I); hydroelectric and wind power installations.
4. Production and processing of metals Installations for the production of pig iron or steel; processing of ferrous metals; ferrous metal foundries; installations for smelting metals and surface treatment of metals and plastic materials; assembly and manufacture of motor vehicles and motor-vehicle engines; shipyards; installations for construction and repair of aircraft; manufacture of railway equipment; swaging by explosives; and installations for the roasting and sintering of metallic ores.
5. Metal industry Coke ovens; installations for the manufacture of glass, cement, asbestos and asbestos products (projects not covered by Annex I); smelting mineral substances; manufacture of ceramic products by burning.
6. Chemical industry (projects not included in Annex I) Treatment of intermediate products and production of chemicals; production of pesticides, pharmaceuticals, paint, varnishes, elastomers and peroxides; storage facilities for petroleum, petrochemical products and chemical products.
7. Food industry Manufacture of oils, fats, dairy products, confectionery, syrup, industrial starch; packing and canning; brewing and malting; sugar, fish-meal and fish-oil factories; and installations for the slaughter of animals.
8. Textile, leather, wood and paper industries Industrial plants for paper and board production (projects not included in Annex I); pre-treatment plants; tanning plants; cellulose-processing and production installations.
9. Rubber industry Manufacture and treatment of elastomer-based products.
10. Infrastructure projects (not included in Annex I) Industrial estates; urban development projects (including shopping centres and car parks); railways and transshipment facilities; airfields, roads, harbours, ports, inland-waterways; dams and water storage facilities; tramways, elevated and underground passenger railways etc.; oil and gas pipe-lines; long-distance aqueducts; coastal and sea defence works; groundwater abstraction and artificial groundwater recharge schemes; water transfer schemes between river basins; motorway service areas.
11. Other projects Permanent motor racing and test tracks; waste disposal projects and waste water treatment plants (projects not included in Annex I); sludgedisposal sites; storage of scrap iron (including scrap vehicles); test benches for engines etc.; installations for the

manufacture of artificial mineral fibres and the recovery or destruction of explosives; knackers' yards.

12. Tourism and leisure Ski-runs, ski-lifts, cable cars etc.; marinas; holiday villages and hotel complexes outside urban areas; permanent camp sites and caravan sites; theme parks and golf courses.
13. Any change or extension of projects listed in Annex I or Annex II, already authorised, executed or in the process of being executed, which may have adverse environmental effects Projects in Annex I, undertaken exclusively or mainly for the development and testing of new methods or products and not used for more than two years.

Note Some of the types of projects listed above are covered by Annex II and the Regulations only if they meet certain threshold levels or other criteria. \* A project which is included in Annex II of the Directive but excluded from Schedule 2 of the Regulations (SI 1999/293).

## Appendix 3: Responses from Environmental Consultation Bodies

## Response from Historic England (Dated 23/08/2021)

Dear Mr Stephenson,

### SHEEPY NEIGHBOURHOOD PLAN – SEA SCREENING REQUEST

Thank you for your consultation of 19 August 2021 and the request for a Screening Opinion in respect of the Sheepy Neighbourhood Plan.

For the purposes of consultations on SEA Screening Opinions, Historic England confines its advice to the question, “Is it likely to have a significant effect on the environment?” in respect of our area of concern, cultural heritage. Our comments are based on the information supplied with the screening request.

On the basis of the information supplied and in the context of the criteria set out in Schedule 1 of the Environmental Assessment Regulations [Annex II of ‘SEA’ Directive], Historic England is of the view that the preparation of a Strategic Environmental Assessment is not likely to be required.

The views of the other statutory consultation bodies should be taken into account before the overall decision on the need for a SEA is made. If a decision is made to undertake a SEA, please note that Historic England has published guidance on Sustainability Appraisal / Strategic Environmental Assessment and the Historic Environment that is relevant to both local and neighbourhood planning and available at:

<https://historicengland.org.uk/images-books/publications/sustainability-appraisal-and-strategic-environmental-assessment-advice-note-8/>

Should it be concluded that, overall, a SEA will be required for the Plan, Historic England would be pleased to discuss the scope of the assessment in relation to the historic environment in due course.

I hope that this information is of use to you at this time. Should you have any queries, please do not hesitate to contact me.

Kind regards,

Dominic Kay on behalf of Clive Fletcher

**BY EMAIL ONLY**

Dear Jason

**Planning consultation:** Sheepy Parish Neighbourhood Plan - SEA Screening opinion

Thank you for your consultation on the above document dated 20 April 2021 which was received by Natural England on 20 April 2021

Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.

Natural England welcomes the Screening Report which assesses the requirement for Strategic Environmental Assessment (SEA) and Habitat Regulations Assessment (HRA) for the Sheepy Neighbourhood Plan.

We can confirm that it is considered unlikely that any significant environmental effects will result from the implementation of the Sheepy Neighbourhood Plan.

Natural England also agrees with the report's conclusions that Sheepy Neighbourhood Plan would not be likely to result in a significant effect on any European Site either alone or in combination and therefore no further assessment work under the Habitats Regulations would be required.

We would be happy to comment further should the need arise but if in the meantime you have any queries please do not hesitate to contact us.

For any queries relating to the specific advice in this letter only please contact Sandra Close on 020 8026 0676. For any new consultations, or to provide further information on this consultation please send your correspondences to [consultations@naturalengland.org.uk](mailto:consultations@naturalengland.org.uk).

Yours sincerely

**SANDRA CLOSE**  
Planning Adviser

**Response from Environment Agency (Dated 5/08/2021)**

Thank you for your email. I take your point. The EA is a consultee in the EIA process.

However, based on the submitted information we have no comments to make on whether an SEA is required.

Regards

Nick
